

Port of Bristol

The Port of Bristol has agreed to a second 3 year term contract with UK Dredging, primarily utilising UKD Dolphin for regular visits to Avonmouth and Portbury entrances.

Port of Waterford - UK Dredging's Tender was successful in securing a second Term Contract for Maintenance Dredging at the Port of Waterford, Ireland. This builds upon the relationship already established with the Port over the last 4 years. This Term Contract is for 3 years. Works will mainly be undertaken by the UKD Bluefin assisted where necessary by UKD Dolphin and UKD Sealion.

Forth Ports - building on the successful long term presence that UKD Marlin has established on the Forth, UK Dredging have once again secured a deal that will see us undertaking the dredging for Forth Ports for a further 5 years. Dredging is primarily carried out at Grangemouth on a monthly basis, with less frequent dredging at Dundee, Rosyth and Leith.

Aberdeen - a 3 year contract with the port of Aberdeen has been awarded to UK Dredging following a competitive Tender Process for the Maintenance Dredging at the Port. This is the 2nd consecutive term contract that UK Dredging have secured in Aberdeen. It is anticipated that dredging will take place in a single campaign in Spring each year by the UKD Marlin assisted by UKD Seahorse.
